Part II: Research, Teaching, and Clinical Contributions

A. Narrative report of Research, Teaching and Clinical Contributions

- Directing a multi-faceted program to support the career development of minority faculty and to address crucial pipeline issues for minorities interested in careers in medicine and science. These programs work toward developing underrepresented minority persons and women and begin at the middle school level and carry on through university, medical school, residency training, and postgraduate training, and faculty appointments.

- Preparation of medical professionals to provide culturally competent care. This includes development of new and the modification of existing teaching methodologies, the identification of general competencies.
- Implementation and direction of three fellowships in minority health policy, all leading to creating physician and oral health leaders with expertise in minority health who will pursue careers in health policy, public health practice and academia.
- Program Director of Cooperative Agreement between the Office of Minority Health, Department of Health and Human Services, and the Minority Faculty Development Program (MFDP) at Harvard Medical School. This agreement recognizes MFDP's role in creating and implementing programs designed to provide skills to enable minority physicians to assume leadership roles minority health policy, and is utilized by Federal agencies as a vehicle for activities aimed at improving or eliminating health disparities that affect minority communities.
- Leadership and coordination of the various activities of the many offices and individuals at Harvard Medical School/Harvard School of Dental Medicine that interact with surrounding community groups and organizations on behalf of the education, research, and business activities of the School. This also includes developing and maintaining positive and productive relationships with community groups and organizations on behalf of Harvard Medical School/Harvard School of Dental Medicine.
- Principal Investigator/Program Director for Harvard Medical School Center of Excellence in Minority Health. The Center of Excellence in Minority Health seeks to enhance the academic performance of underrepresented minority students, strengthen efforts to support the cultural competency preparedness of faculty, residents, and students and to expand current models for underrepresented minority faculty development and student/faculty research that focuses on issues of minority health and health disparities.

Innovative Educational ProgramsCapacity Building

- 1991- Biomedical Science Careers Program. Provides biennial conferences for New England area minority students (high school through professional school) interested in careers in science and medicine. Develops conferences for minority faculty, house staff and postdoctoral fellows from the New England area interested in furthering their careers in science and medicine. *Through its newsletters, conferences, scholarships and directories, the Biomedical Science Careers Program has served as a resource to more than 2,500 minority students throughout the New England area. (this is also listed under Section C.2.b., Professional and Educational Leadership Roles Related to Teaching, page 18)*
- 1990- Visiting Clerkship Program. An academic program for fourth-year and qualified third-year minority medical students attending U. S medical schools. The program provides faculty advisors, dinner seminars with senior minority faculty, housing, transportation, career counseling and an opportunity to meet HMS faculty, house staff and medical students. *•Since its inception in 1990, the program has hosted close to 500 students, 11% of whom have matriculated in residency programs at Harvard-affiliated hospital. Six of these persons are now members of the Harvard faculty.*
- 1993- Project Success. Targets Boston and Cambridge minority high school students who participate in mentored summer research internships at HMS and its affiliated institutions. The program is augmented by seminars and workshops given by faculty and administrators, site visits, an SAT preparation course and career guidance counseling. Students have the opportunity to return to the program for multiple years, i.e. high school through college. *•To date, 99% of program participants have matriculated at four-year colleges (e.g., 8 at Harvard University) and several have entered medical, dental and graduate school.*
- 1997- Health Policy Summer Program. A summer program created to provide a 10-week mentored summer research experience with senior Harvard faculty in the areas of health service or health policy research for minority students, particularly African-American, Native American and Hispanic American, attending a Minority Access Research Career

Program funded institution, Historically Black College or University, or a Hispanic-Serving Institution.

- *Of the 49 students who participated in this program and have graduated from their undergraduate schools, 45% have gone on to medical/graduate school or fellowships.*

Leadership/Training

- 1994 Neuroscience: Exploration of Brain and Mind. Seven and a half-hour live, interactive satellite program televised to 70 schools/districts in 5 states.
- 1994- Teacher Institute. Teacher development program that offers an intensive 3-day summer workshop designed to introduce Boston Public Schools middle and high school science teachers to inquiry-based biomedical cases. The Institutes also offers Breakout Sessions for Teacher Fellows during the academic year and provides curriculum kits for classroom use.
 • *To date, the Teachers Institute has instructed 78 middle and high school teachers.*
- 1995- Commonwealth Fund/Harvard University Fellowship in Minority Health Policy (CFHUF). Designed to prepare physicians, particularly minority physicians, for leadership roles in formulating and implementing public health policy and practice on a national, state, or local level. This is a one-year, full-time, academic degree-granting program. Collaborative effort by members of the faculties of Harvard Medical School, Harvard School of Public Health, and Kennedy School of Government.
 • *To date, 23 fellows have graduated from CFHUF. All are actively engaged in aspects of policy, research and/or service delivery related to minority health, and 85% currently hold faculty appointments in schools of medicine and/or of public health. Nine (40%) of the CFHUF alumni have become faculty members at HMS.*
- 2000- Health Resources and Services Administration Oral Health Program. Two year, full-time, academic degree-granting program designed to create dentist-leaders, particularly minority dentist-leaders, who will pursue careers in health policy, public health practice and academia. Collaborative effort by members of the faculties of Harvard Medical School, Harvard School of Dental Medicine, Harvard School of Public Health, and Kennedy School of Government.
 • *First year is currently supporting two fellows.*
- 2001- California Endowment Harvard University Scholars in Health Policy. One year, full-time, academic degree-granting program designed to prepare California's outstanding physicians, dentists, and mental health providers, particularly URM minority health professionals, for leadership roles in health policy in a multicultural and ethnically diverse society.
 • *First class of fellows to start July 1, 2002.*
- 2002-2005 Center of Excellence in Minority Health. Faculty Fellowship Program that will provide training and support for 8 (2 cohorts of four 2-year fellows) underrepresented junior faculty with an emphasis on minority health and/or health disparities.
 • *First class of fellows to start in 2003*
